 4. Experience acquired **after** obtaining the essential qualification will only be considered valid.
- **Resolution of Tie:** In the event of a tie between candidates, the following tie-breaking rules will be applied:
 1. **Total Marks in the Core Section:** Candidates will be ranked based on their total marks in the core section of the examination, with higher scores placing candidates higher on the merit list. The core section will consist of 60% of the questions pertaining to the core subject syllabus, as defined by the Examination Section of KGMU for each exam.
 2. **Number of Incorrect Answers:** If the tie persists, candidates with fewer incorrect answers or negative marks will be ranked higher on the merit list.
 3. **Date of Birth:** If a tie still exists, the older candidate will be placed higher on the merit list.
 - **Selection Process:** The selection will be done based on the marks obtained in the Common Recruitment Test (CRT). There will be no interview as per “The Uttar Pradesh Direct Recruitment to Junior Level Posts (Discontinuation of Interview) Rules 2017” (No 4/2017/1/1/2017-Ka-2), dated 31 August 2017.
 - **Final Merit List:** The final merit list will be prepared based on the marks obtained in the CRT only for all categories (i.e. GENERAL, OBC, SC, ST, EWS, etc) separately and rank will be awarded to all qualified applicants. While preparing the merit list for the General (Unreserved) category, all applicants (including those from the reserved categories) will be taken into consideration, but while preparing the merit list for a reserved category, only applicants of that category will be taken into consideration. The same method will be applicable in all reserved categories.
 - **Results:** Examination marks will be displayed on the website.
 - **Verification of Documents**

Candidates will be invited for the physical verification of original documents at KGMU according to their merit list and category, following the declaration of examination marks. The schedule and dates for this process will be posted on the website. Please note that mere verification of documents does not guarantee an appointment.

- **Appointment Letters**

Appointment letters will only be issued to successful candidates based on the merit list and category, provided their documents have been verified.

- **Biometric Verification**

Biometric verification of candidates will be conducted at various stages, including during the examination, document verification, and after joining KGMU. Any instance of impersonation will be addressed rigorously in accordance with the law, resulting in the cancellation of candidature and potential legal action.

Score Normalization

About Normalization

Normalization means adjusting values measured on different scales to a notionally common scale.

Need for Normalization in Examination:-

Exam pertaining for a particular post/course could be spread across multiple shifts which will have different question paper for each shift. The normalization is to be done by considering the difficulty level of each set, since the questions may be different in different sets and the difficulty level of a particular set may be different from other sets.

Hence the normalization of scores need to be carried out for all the candidates who had written the exam, across shifts for the same post/course.

Normalization Method:

The following has to be calculated for every shift for all the candidates who have written the exam for the same post:

- a. Average score for each Shift X_{av} = total marks scored by candidates in a shift divided by no. of candidates in the shift.
- b. Standard Deviation of score for each Shift. Standard Deviation is a measure that is used to quantify the amount of variation of a set of data values:

N = Number of candidates

X = Raw score of candidates

L = Total Raw score for all candidates in a shift

X_{av} = Average which is total marks divided by no. of candidates.

x = Raw Score of candidate – Simple Average (XX_{av})

Standard Deviation (S) = $(\sum x^2)/N$

Normalization Formula

Normalized Score for each candidate (X_n) = $X_n = (S_2/S_1)*(X - X_{av}) + Y_{av}$

S_2	Is the SD of the shift with the Highest Average Score taken as Base for normalization (Criteria for choosing the base for normalization is generally taken as the shift with 'Highest Average' of raw scores)
S_1	Standard Deviation for the corresponding shift (to be scaled to S_2)
X	Raw score of a candidate
X_{av}	Simple average of the shift
Y_{av}	Average corresponding to shift with highest Average (taken as Base for normalization)
